

# Mint Asset Management Funds Mint Diversified Growth Fund

Fund Update for the quarter ended 30 June 2023

This Fund Update was first made publicly available on 27 July 2023

#### What is the purpose of this update?

This document tells you how the Mint Diversified Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mint Asset Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

#### Description of this fund

The Fund invests across a range of asset types which includes New Zealand and international equities (including listed property if held), but will also hold cash and fixed interest. The objective of the Fund is to deliver returns in excess of the Consumers Price Index (CPI) by 4.5% per annum, before fees, over the medium to long term. The relevant market index for the Fund is a composite index derived from the underlying asset classes of the Fund.

| Total value of the fund   | \$107,074,824    |
|---------------------------|------------------|
| The date the fund started | 10 December 2018 |

### What are the risks of investing?

To determine the risk indicator, actual returns and returns from a composite index were used as this Fund has not been in operation for the required 5 years (inception 10 December 2018). As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years' performance history ending 30 June 2023. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

| Other charges                               | \$0                    |
| *Fund charges are inclusive of GST          |                        |

See the PDS for more information about the basis on which performance fees are charged.

Small differences in fees and charges can have a big impact on your investment over the long term.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawal from or switching funds), although these are not currently charged. See the PDS for more information about those fees.

#### Example of how this applies to an investor

Annie had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Annie received a return after fund charges were deducted of \$1,015 (that is 10.15% of her initial \$10,000). Annie did not pay any other charges. This gives Annie a total gain after tax of \$950 for the year.
