|                                  |                         |
|----------------------------------|-------------------------|
| <b>Total value of the fund</b>   | <b>\$5,781,413</b>      |
| <b>The date the fund started</b> | <b>10 December 2018</b> |

### What are the risks of investing?

To determine the risk indicator, actual returns and returns from a composite index were used as this Fund has not been in operation for the required 5 years (inception 10 December 2018). As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund.

### How has the fund performed?

|   | <b>Past year</b> |
|---|------------------|
| <b>Annual return</b> (after deductions for charges and tax)                   | Not Applicable   |
| <b>Annual return</b> (after deductions for charges but before tax)            | Not Applicable   |
| <b>Market index annual return</b> (reflects no deduction for charges and tax) | 7.81%            |

The market index return is a composite index comprised of S&P/NZX Bank Bills 90 Day Index (5%); S&P/NZX Investment Grade Corporate Bond Total Return Index (15%); S&P/NZX 50 Gross Index (15%); S&P/NZX All Real Estate (Industry Group) Gross Index (5%); S&P Global BMI (NZD Hedged) Net Total Return (60%), being the fund's relevant benchmark stated in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the Benchmark Indices document on the offer register at <http://www.business.govt.nz/disclose>.

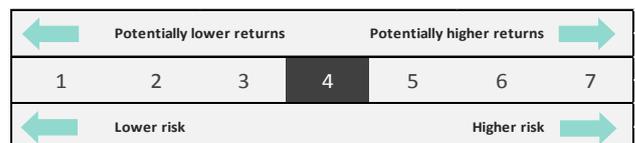

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

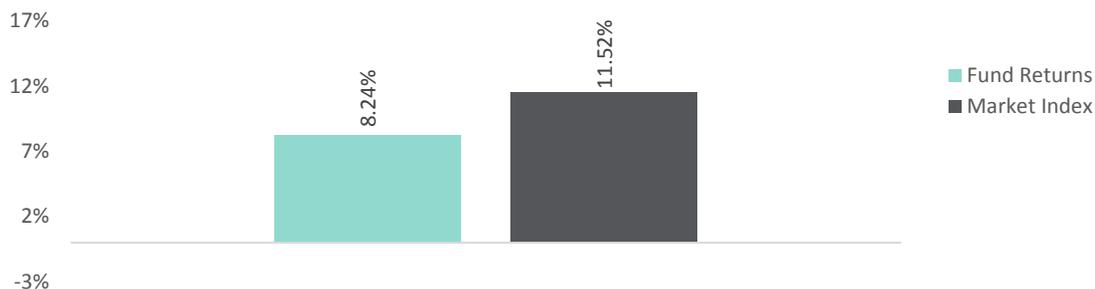

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years' performance history ending 30 June 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.
